MA327E — CONSUMER, SCIENTIFIC, TECHNICAL AND INDUSTRIAL GLASSWARE

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers all manufacturers and fabricators of the consumer, scientific, technical, and industrial glassware. Establishments (primary and secondary) manufacturing glassware from glass produced in the same establishment and those manufacturing glassware from glass purchased or transferred from other establishments of your company are included.

2. Figures to be reported

a. Quantity

Figures may be based on records of sales, shipments or billings, whichever most closely approximates the physical movement of products out of this plant.

Include -

Products transferred to other establishments of your company as well as products shipped to your customers.

Products shipped on consignment, whether or not sold at the end of the year.

Subtract returned products previously shipped.

Do not include shipments of products purchased and resold in the same condition.

Report in 1,000 pieces or 1,000 dozens as requested for specified items.

b. Value

Report the NET selling value at the factory or plant of the total quantity of each product designated. This value should approximate as nearly as possible the actual amounts received or receivable by you for shipments made during the year. The reported figures should represent values, f.o.b. plant, after discounts and allowances and should not include freight charges and excise taxes.

Include cost of containers in which products were shipped. For products transferred to other establishments of your company (such as other manufacturing plants, separate sales departments, sales branches, retail stores, etc.), value should be the nearest approximation to the net selling value of the products; that is, the value that would have been realized if the products had been sold f.o.b. plant.

C. Column structure of report

SECTION I — Consumer Glassware (Machine Made and Handmade), Item codes 1141-1200

Column (1) Total Quantity of Shipments — Report the total quantity of shipments of consumer glassware in the unit of measure specified. The total quantity of shipments should be the sum of the machine made and handmade columns.

Column (2) Total Value of Shipments — Report the total value of shipments in thousands of current U.S. dollars. The total value of shipments should be the sum of the hand and machine made columns.

Column (3) Machine Made Quantity — Report the total quantity of shipments for the machine made glass in the unit of measure specified.

Column (4) Machine Made Value — Report the total value of shipments for machine made glass in thousands of current U.S. dollars.

Column (5) Handmade Quantity — Report the total quantity of shipments for handmade glass in the unit specified.

Column (6) Handmade Value — Report the total value of handmade glass in thousands of current U.S. dollars.

Section II — Lighting, Automotive, Scientific, Technical, and Industrial Glassware (Machine Made and Handmade) — Report the total value of shipments for machine made and handmade glassware in thousands of current U.S. dollars.

- 3. Definitions of consumer, scientific, technical, and industrial glassware
- a. Consumer Glassware (Table, Kitchen, Art and Novelty Glassware) (Includes machine made and handmade articles.)
